DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 12-13, drawn to a collimating device, classified in class 359, subclass 641.
- II. Claims 9-11, drawn to a method of making a collimating device, classified in class 264, subclass 1.25.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the collimating device may be made by affixing a filter to a GRIN lens.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Wei Chung on January 22, 2003, a provisional election was made without traverse to prosecute the invention of a collimating device, claims 1-8 and 12-13. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-11 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 2873

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 and 12-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Ryall (USPN 6382841).

Ryall teaches all of the claimed limitations including an optical coupling collar having a tubular structure with a cylindrical cavity (206) for receiving a GRIN lens, a second rectangular cavity (210) for receiving a thin film filter (column 8, lines 64-65) and the bonding of the lens

Art Unit: 2873

and the filter to the coupling collar via an adhesive (column 11, lines 40-45 and column 12, lines 52-55). Rydall also teaches a non-adhesive method of mounting the lens and filter (column 9, lines 36-44) and accommodates for a variety of configurations and offset for the mounting of the lens (column 10, lines 31-36).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee (USPN 5845023) and Zheng (USPN 6347170) teach optical coupling devices.
